

***Iowa DOT is  
Taking Comments on a  
Noise Wall  
Replacement Project  
on U.S. 218  
in the City of Keokuk***

Project Number: ER-218-1(087)-28-56

Created: 07-09-2024

**Proposed Noise Wall Design Features:**

- ◆ Approximately 15 feet tall.
- ◆ Same locations and limits as the previous wooden noise wall.
- ◆ Precast concrete construction: all components factory made, then installed on site.
- ◆ Supporting columns set in concrete foundations below grade to roughly 12 feet deep.
- ◆ Two different textures: “drystack stone” on bottom panels, “rustic barn wood” on upper panels.
- ◆ Integral brown color for panels and supporting columns.
- ◆ Anti-graffiti protective coating for easy graffiti removal without wall damage.

# Iowa DOT - Noise Wall Replacement Project in the City of Keokuk

- ◆ Scheduled for letting on November 19, 2024.
- ◆ Construction completed in 2025.

## Proposed Design Features:

The images in this document represent a preliminary conceptual aesthetic design for the proposed noise wall replacement project. Final appearance of particular elements of the finished project may be different than shown in illustrations.
